

# No More Watchful Waiting!

## General Roach's Army to be Attacked by the Army of Housewives Commanded by General Peterman

### GEN. PETERMAN, COMMANDER-IN-CHIEF OF ARMY OF EXTERMINATION

#### Services of Texas Rangers and Aeroplane Corps Unnecessary

General William Peterman, veteran of many campaigns, has been chosen to lead the army of extermination in the clean-up campaign now being waged in Washington.

The appointment, sought by many able strategists, has been made through no favoritism, but because General Peterman's long experience and fine record as a leader and strategist entitle him to the honor.

No quarter will be given, and no prisoners taken. War to the death is the watchword passed along the lines, and the slaughter of the enemy will be terrific.

Supply depots, strategically located in the stores of all Washington Druggists, are prepared to furnish ammunition in quantity to the troops of housewives under General Peterman's command, and scouts are already reporting preparations by the enemy for evacuating entrenched positions.

Strong detachments of the army had a brisk skirmish with the enemy in Georgetown this morning, who retreated leaving many dead and dying on the field.

Sounds of battle are heard in the direction of Glen Echo as we go to press, but definite news of the result of the engagement has not as yet been received.

General Peterman announces that with the forces, supplies and equipment at his command no outside help will be necessary in the clean-up campaign now in progress in Washington, and has declined all offers of outside assistance.

"We are well able to handle the situation with our present forces," said General Peterman to the newspaper men this morning, "and with the thorough and carefully planned attack all along the line, the campaign will soon be over."

#### Aeroplanes Cannot Be Used

"From the very nature of our enemy and its habitat it will be impossible to use aeroplanes for scouting or attack. Only one kind of powder is suitable for routing the foe, and that is Peterman's Roach Food, and it cannot be fired from the army field pieces or muskets."

"The attacks will be directed at night against the enemy's intrenchments, and searchlights will play an important part in the result."

#### No Press Censorship

"You newspaper men will be welcomed inside the lines at all times, and fully posted as to the progress of the campaign. I am a thorough believer in publicity, and the newspapers will have every facility afforded them to report the results of every battle."

### Clean-up Campaign Begins April 15th

THIS IS THE SEASON, THIS IS THE TIME for a general clean-up campaign against Roaches, Water Bugs and Bed Bugs. Clean them out now by using Peterman's Roach Food and Peterman's Discovery. Kill these loathsome pests now, while doing Spring House Cleaning, and you kill the eggs, too. No home, no matter how carefully guarded, is immune from invasion.

#### HOW THESE PESTS MAY ENTER YOUR HOME

LAUNDRY

In your laundry work, from other folks' soiled garments.

MAID

A servant may bring the sleep destroyers in her clothes.

STREET CAR

You may pick them up in a street car or in almost any public place.

MARKET BASKET

They may smuggle themselves in inside a market basket or other delivery.

NEW HOUSE

You may move to a new home or apartment and find a few of these tenants already hiding about.

There Are Other Ways—Many Ways—They Can Get In  
There Is ONE SURE WAY to Get Them OUT

# Peterman's

PETERMAN'S DID IT

## ROACH FOOD

Kills Roaches and Water Bugs

Prominent Medical Authorities Assert

How You Use It

To make the campaign effective it is necessary that all the premises suffering from the pests be treated simultaneously and thoroughly to KILL THEM ALL. If only a few premises are treated, Roaches and Bed Bugs breed so rapidly that where undisturbed they will soon infest the places cleaned. Spring is the time these pests breed, multiply, and spread to an alarming extent, and it is at this season that the housewife can do the most effective work in destroying the old and young bugs—thus preventing the spread of the pests.

#### Used Also As a Preventive

Peterman's Roach Food should be applied in every household and the powder sprinkled out of sight, where it will remain undisturbed in cracks and crevices where roaches hide. If one or two roaches invade the premises they will be promptly killed by the Roach Food, preventing the establishing of a colony of roaches in the household before the housewife becomes aware of their presence. By sprinkling Roach Food out of sight in crevices, etc., it will not be swept up, but will serve as a preventive to keep the premises continually free from pests.

Peterman's Discovery (liquid) should be applied to bedsteads during Spring and Fall cleaning. With the spout on every can you can force it into all the seams and joints of your bed and woodwork in the room. It kills the bugs and kills their eggs, and is effective as a preventive. A pint can of Discovery is enough for a single bedroom, and will rid the worst infested room.

Start Your Part of the Fight. The Day Is HERE, the Time is NOW

That bed bugs (Cimex lectularius) are known to convey germs of diseases by biting the unsuspecting sleeper. Health boards have issued bulletins pointing out the perils of such infection.

Roaches (Periplaneta Americana) inhabit the toilets, sewers, and other unsanitary places by day, and at night come forth with every variety of filth sticking to their feet. They run over dishes, uten-

sils and food, leaving a trail of millions of disease germs.

The one safe, sensible thing to do is to rout them out forever, while other families are doing the same, by killing them with Peterman's.

Every Washington housewife is a captain in this campaign and her own home is the firing-line. Don't let your home be a weak spot in the defense of Washington against roaches and bugs.

#### It Costs Only a Little to Kill Off All These Pests

Peterman's Roach Food comes in 15c., 25c., and 50c. Cans. Peterman's Discovery in 15c. and 25c. Cans. Ask for PETERMAN'S. It's on the Red cans, in lettering like the big name on this page. It's been the best for 28 years. Widely imitated, but never equalled. Ask your neighbor about Peterman's, and insist on getting it.

Buy Peterman's from the following Reliable Washington Dealers. They have fresh stocks and can fill all orders promptly. See displays in Dealers' Shops

# DISCOVERY

## Kills Bed Bugs and Their Eggs

### How Peterman's Kills

Peterman's Roach Food has been the housewives' dependence for 28 years for quickly killing roaches and water bugs. It contains food substances or baits which entice them from their hiding places. They eat it and die. If they travel even over it it kills them, ridding the premises in one or two days if applied as directed. Don't put off your part of this city-wide fight. Kill these dangerous insects now, while they are breeding.

Dr. Wm. Peterman's Personal Guarantee to You

#### GUARANTEE

I hereby guarantee that Peterman's Roach Food, Peterman's Discovery (liquid), and Peterman's Ant Food will entirely rid any building or premises of roaches, water bugs, bed bugs, or ants if the above preparations are used in accordance with directions plainly printed on each package. I authorize any dealer to cheerfully refund the purchase price of the above preparations to the purchaser who can show that under the above conditions the preparations have not rid the premises of bugs, and charge the sum to us. It will be promptly paid.
